SPARE PARTS LIST

Instructions for Ordering Spare Parts

Parts illustrated on the following pages are marked with position numbers. The text below the illustration will tell you part number and description. Changed parts are marked with a stroke in front of position number. To avoid errors each order must contain the following details:

Part number and description of parts (stated in the list)

Quantity of parts required

Requested delivery (post, freight, express)

Full address of purchaser (with postal code)

The part numbers listed here have priority over any impressed numbers on parts.

Bolts, nuts, spring washers and washers for mounting complete groups of spare parts are not normally provided in the delivery. If these are required, please give the part number of these fitting parts.

The part number index on the end of the list is for finding parts of which the numbers are known quickly.

Abbreviations:	hex.	=	hexagon
	cpl.	=	complete
	int.	=	interchangeable
	nb	=	as required
	*	=	not illustrated

The Machine number of your baler is stamped into the model data plate shown in the adjoining illustration. As it is essential to quote this number in full in all your enquiries and spare parts orders, we recommend you to note it down in the space below:
